Georgia State University and **Georgia Institute of Technology** are joining together in Psychology Research at a new Facility, The Center for Advanced Brain Imaging at 831 Marietta Street. Faculty, Researchers, Post Doctoral Students and Graduate Students will share the facility. Focused Psychological research will be on Autism in Children and Alzheimer's in the aging population. InSight has designed the facility to support both youthful and aging patients visiting The Center. Collaboration of research with the families of these patients and with the two University's Faculty is the primary function of the facility. An fMRI will located in the facility as a focused research of the brain's activity with audio and visual stimulus' will be documented.

LET INSIGHT BRING OUR TALENTS AND OUR EXPERIENCE TO YOUR NEXT PROJECT

Educational gardening school children !

Allison chairs the Morningside Elementary School Outdoor Classroom and Garden

Morningside Elementary School's Outdoor Classroom is a working research garden. Grades K through 5 explore butterflies, weather, herbs, vegetables, American Indian plantings, along with soil and water conservation. Sunflower seeds will be sold at the Morningside Fall Festival. Kindergarteners learn about nutrition, organisms, and seedlings. www.morningsideschool.org
